Requirements

- WordPress 5.4 - 6.4
- WooCommerce 4.2 - 9.0.2
- jQuery
- PHP 7.2 - 8.1
- PHP extensions:
 - curl
 - json
 - openssl
 - readline

Installation and activation

The plugin is available for download from [Wordpress.org](https://wordpress.org) website.

The plugin can be installed in two ways - manual upload via WordPress admin panel or manual plugin installation on web server.

If you are new to WordPress, we advise using manual upload via WordPress admin panel.

Manual upload via WordPress admin panel

1. In the administration panel, select **Plugins** → **Add New**, then select **Upload Plugin** button and select the zip file you downloaded.
2. Activate the plugin by selecting **Activate** in **Plugins** → **Installed Plugins**.

Manual plugin installation

1. The downloaded plugin should be unpacked into `wp-content/plugins` directory on web server with your store files.
2. Activate the plugin by selecting **Activate** in **Plugins** → **Installed Plugins**.

Configuration

1. Go to WooCommerce plugin settings panel **WooCommerce** → **Settings**.
2. Enter **Payments** section.
3. Look for **Conotoxia Pay** on payments methods list.
4. Click **Set up** button next to **Conotoxia Pay** payment method.
5. Fill all fields in configuration page:
 - **API Client identifier** and **API Client secret** - API access data that can be obtained in **Merchant's panel** in **Access data** section.
 - **Point of sale identifier*** - the identifier of the created point of sale.
 - **Private key** - it is possible to generate a private key on the plugin configuration page. A public key is generated from the private key entered on the plugin configuration page. This key is automatically transferred to Conotoxia Pay when generating key. It is not necessary to enter the key in the Merchant's panel. Additional instructions on how to generate keys can be found in the **documentation**.
 - **Sandbox mode** - it is possible to test the module on a test environment. In order to gain access to the test environment, go to the **conotoxia.com**.
 - **Conotoxia Pay payment icon** - it is possible to add the Conotoxia Pay icon to the payment selection list.
 - **Payment method icons** - it is possible to select visible payment method icons on the payment method selection screen.
6. Enable payment using **Enable/Disable** checkbox.

* Store and point of sale can be created through the wizard in the **Merchant's panel**.

Point of sale configuration in the **Merchant's panel**

The point of sale should be set up according to the configuration below:

- URL address for payment creation notification - `https://store.com/?wc-api=WC_Gateway_Conotoxia_Pay`
- URL address for refund creation notification - `https://store.com/?wc-api=WC_Gateway_Conotoxia_Pay`
- URL address for successfully executed payment - `https://store.com/`
- URL address for unsuccessful payment - `https://store.com/`
- List of allowed URL addresses - `http://store.com/`

Where there is a `store.com`, it should be replaced with your woocommerce shop domain.

Activation of a public key in the **Merchant's panel**

The public key created and sent using the plugin must be activated.

In order to activate public key redirect to **Merchant's panel**.

Refund

Refunds can be ordered from within the plugin and from the **Merchant's panel**. In case of ordering from Merchant's Panel, you need to fill in **External payment refund number** according to the order number from the store. If the field is omitted then no notification will be delivered to the store.

Plugin compatibility

Please be aware of the possibility of incompatibility with other plugins or system components when using this plugin. Despite efforts to ensure the highest possible compatibility, it cannot be guaranteed that the plugin will work seamlessly with all other third-party plugins.
