## Functionality

This plug-in enhance Woo Commerce Store to receive one or more files from customer directly while they purchase items.

## Features

- This plug-in will able you to get files from customers on following basis:
  - Product Detail Page
  - Cart Page
  - Checkout Page
- You can also get details/feedback from customer in small text box (text-field) and/or in a large textbox (text-area), for example customer need to be printed their label on t-shirt along with images they are sending to store admin.
- Full Control over file management for store admin.
- Provide facility to customers for File Preview, Error Notices & Remove file before uploading if they want.
- Extensive file cleanup process on many stages if user left sites or removed items from cart.
- WordPress built-in scheduling (cron job) for files which were uploaded by users but no proceeding to complete order (abandoned order and did nothing after adding into cart and uploading files).
- Very strong security check with wordpress built in wp\_nonce fields.
- File validation checking on both client and server side.
- Store admin will receive files directly in order details page.
- Plug-in uses standard woocommerce hooks to perform file handling.
- Popover positioning and all labels customization.
- Strong coding practices of file auto-loading and clean code for customization.
- Compatible with all themes that follow WooCommerce Standard
- Error Log maintenance .
- Can be used for any type of files. Images, PDF,Docx, xls etc
- Standard wordpress short-codes that can be used in woocommerce files.

## Minimal Setup

1. Download plug-in from [wordpress.org](http://wordpress.org).
2. Upload it in `wordpress/wp-content/plugins` directory.
3. Go To Plugins Menu and Activate it.
4. Go to Settings-> Woo File Dropzone
5. Configure options as needed and click save.

## Configuration options

- Upload button title  
Title of the button on which user clicks to open file drop box.
- Send button title  
Title of the button on which user clicks to send file.
- Already uploaded message  
This message will be shown to user when he has uploaded files.
- Allowed file types

- File type error message  
Message that will be shown to user when he will upload file that is not allowed.
- Max file size  
Maximum file size that user can send in MB.
- Allowed number of files  
Total number of files user can send (multiple files can be received).
- Popover direction  
Direction of displaying the popover when user clicks on upload button.
- Show on product detail page  
Tick this checkbox to show file box on product detail page.
- Show on cart page  
Tick this checkbox to show file box on cart page.
- Show on checkout page  
Tick this checkbox to show file box on checkout page.
- Use with short-code  
Tick this box to use file box with short-codes (see section bellow for short-codes).
- Input Fields  
Along with files other related information can also be received in small text boxes or big text boxes.

## Adding Text boxes

1. Type label of the field.
2. Check Show field checkbox.
3. Select field type.
4. Check required field, if this field is mandatory to fill along with file upload.
5. click on 'add+' to add more fields or on 'remove' button to remove fields.

### **Note:**

By default there is one field which cannot be deleted, just change its label as per your requirement or uncheck 'show field' checkbox to hide it.

### **Tip:**

You can use as many fields as you want but use few fields so that file box will be more correctly display to user.

## Setting up file box for product detail page

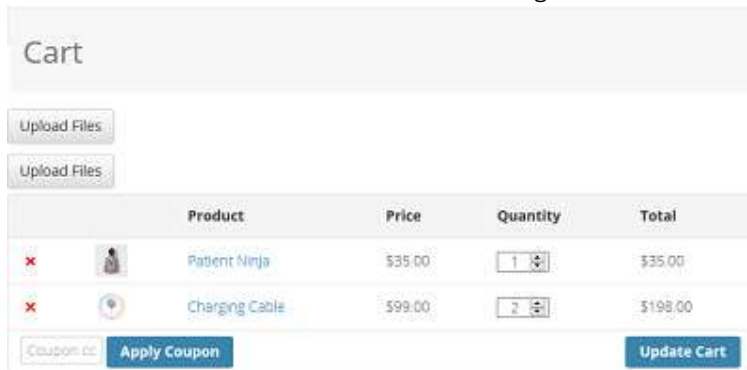

1. Go to plug-in configuration menu.
2. Insert necessary options.
3. Click on save.

## Setting up file box for cart page

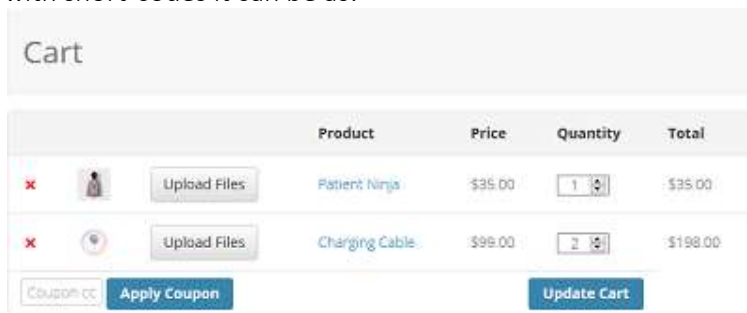

1. Go to plug-in configuration menu.
2. Insert necessary options.
3. Click on save

### Note

As you will notice in cart page 'upload file button' will be shown on above the cart which is displayed using standard woocommerce hook. If there are more than one items in cart 'upload file button' will be stacked and will not look good as in following image.

The remedy for that issue is use short-codes of the plug-in to insert file box on proper location (see short-codes section below).  
with short-codes it can be as:

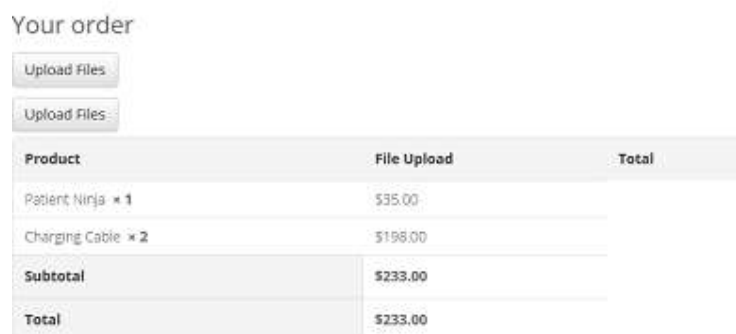

## Setting up file box for checkout page

1. Go to plug-in configuration menu
2. Insert necessary options.
3. Click on save

### Note

As you will notice in checkout page 'upload file button' will be shown on above the order detail section which is displayed using standard woocommerce hook. If there are more than one items in cart, 'upload file button' will be stacked and will not look good as in the following image:

The remedy for that issue is use short-codes of the plug-in to insert file box on proper location (see short-codes section below).

with short-codes it can be as:

Your order

Product	File Upload	Total
Patient Ninja × 1	<input type="button" value="Upload Files"/>	\$35.00
Charging Cable × 2	<input type="button" value="Upload Files"/>	\$198.00
<b>Subtotal</b>	\$233.00	
<b>Total</b>	\$233.00	

## Short-codes

Plug-in have short-codes specifically for cart and checkout page where 'upload file button' should be displayed in table rows of the items.

### Tip

Sample files for all short-codes are provided with detailed comments in it, located at:  
`wp-content/woo-file-dropzone/shortcode-example-files`

## Short-code for product details page

short-code: `[woo_file_dropzone_product_detail_page]`

### How to use

If you are using standard woocommerce themes then location is:

`wp-content/plugins/woocommerce/templates/single-product/simple.php`

Include shortcode using php in somewhere location according to theme need. as

```
<?php echo do_shortcode("[woo_file_dropzone_product_detail_page]"); ?>
```

if you are not using standard theme then location will be woocommerce directory of your theme.

## Short-codes for cart page

short-code: `[woo_file_dropzone_cart_page cart_item_key={$cart_item_key}]`

### How to use

On cart page actually there is a `php` loop that displays items in table format, so you have to put file upload button short-code in `<td>` somewhere within loop as :

```
<td>
<?php
echo do_shortcode("[woo_file_dropzone_cart_pagecart_item_key={$cart_item_key}]");
?>
</td>
```

### Note:

Please refer short-code example file in which a lot of comments are written for using this short-code. if you are using standard woocommerce theme, then backup original file and replace file from example file.

## Short-codes for checkout page

short-code: `[woo_file_dropzone_checkout_page cart_item_key={ $cart_item_key }]`

### How to use

On checkout page actually there is a `php` loop that displays items in table format, so you have to put file upload button short-code in `<td>` somewhere within loop as :

```
<td>
<?php
echo do_shortcode("[woo_file_dropzone_checkout_page cart_item_key={ $cart_item_key }]");
?>
</td>
```

### **Note:**

Please refer short-code example file in which a lot of comments are written for using this short-code. if you are using standard woocommerce theme, then backup original file and replace file from example file.
